

Software Development Engineer 1 (SDE 1)(Java Backend)

Department: Technology

Work location: Bengaluru

About The Role

MoveInsync (<https://moveinsync.com/moveinsync-one/>) and WorkInsync (<https://moveinsync.com/workinsync/>) are innovative tech companies dedicated to transforming the transportation and workplace management industries. Our cutting-edge software solutions optimize employee transportation for businesses and streamline workplace operations, respectively. We are seeking a highly motivated intern to join our team and contribute to Java Spring Boot backend development projects. If you're a B.Tech or MCA student with a passion for coding, exceptional problem-solving skills, and a strong foundation in data structures and algorithms, we want you to be a part of our dynamic teams.

In this role, As a Java Spring Boot Backend Intern at MoveInsync/WorkInSync, you'll have the opportunity to work alongside experienced software engineers and contribute to the development of robust and scalable backend solutions. This internship is tailored for college students pursuing a B.Tech or MCA degree, who are passionate about Java Spring Boot coding and have a knack for problem- solving. It offers a valuable hands-on experience in a dynamic and fast-paced environment.

What You'll Do:

- **Software Development:** Collaborate with our skilled software engineering team to design, develop, and maintain Java Spring Boot backend applications that power our transportation solutions.
- **Coding and Debugging:** Write clean and efficient code while actively participating in debugging and troubleshooting efforts.
- **Problem-Solving:** Apply problem-solving skills to address technical challenges and contribute creative solutions to enhance our software products.
- **Documentation:** Document code, Unit Testing, processes, and best practices to facilitate knowledge sharing within the team.
- **Quality Assurance:** Assist in testing and quality assurance activities to ensure the reliability and performance of our software applications.
- **Learning and Growth:** Actively seek opportunities for learning and skill development in Java Spring Boot development and related technologies.
- **Team Collaboration:** Work collaboratively with cross-functional teams to achieve project goals and deliver high-quality software solutions.

What You'll Need:

- Bachelor's or Master's degree in Computer Science, Software Engineering, or related field, with a focus on Java programming and software development.
- Proficiency in data structures and algorithms, with the ability to apply them effectively in solving complex problems.
- Solid profile on GitHub/Hackerrank/HackerEarth/CodeChef.
- Strong interest in Java Spring Boot backend development.
- Basic understanding of Java programming concepts and object-oriented principles.
- Problem-solving mindset with a passion for tackling hard technical challenges.
- Eagerness to learn and adapt to new technologies and best practices.
- Effective communication and teamwork skills.
- Ability to thrive in a fast-paced and collaborative work environment.
- Previous coursework or personal projects related to Java Spring Boot is a plus.
- Self-motivated and adaptable.

Advantages of Working with MoveInsync/WorkInSync:

- Real-world experience working on impactful projects.
- Mentorship from experienced software engineers who are dedicated to your growth.
- A dynamic and inclusive work environment that encourages innovation.
- A fast-paced work environment with ample opportunity to learn and grow.
- Opportunities for skill development and career advancement.
- Flexible work hours to accommodate your college schedule.
- Competitive salary.
- Free meals.
